EDUCATION

Montessori Professional College
(Imus Campus)

- Degree of Science in Computer Science

SEMINARS AND TRAINING

Virtual Assist Online

- Virtual Assistant courses

Clairvoyance E-learning Academy

- Bookkeeping and Accountant Seminar

PROJECTS

Centralized System

- Built a centralized web system that automatically captures employee performance on every login, automates checklist collection, and integrates directly with existing systems — eliminating dependency on multiple tools and giving teams a single platform to manage and track everything in real time.

Centralized Master

- Built an integrated management system that automates masterlist maintenance and provides real-time tracking of employee violations, transfers, PRF requisitions, and computer asset information — eliminating manual updates and improving data accuracy across departments.

Bundenban Shiyousho

- Built a system that automatically aggregates all required data sources to enable accurate and automated generation of Bundenban serial indicators — eliminating manual lookups and reducing processing time.

Data Gathering

- Built a system that extracts and consolidates required data from multiple databases into a structured CSV export — streamlining data collection, reducing manual effort, and enabling accurate cross-system reporting.
