ABOUT ME

Full Stack Web Developer with 6+ years of experience in web application development, backed by 3 years in technical support and 5 years in customer service. Skilled in both frontend and backend technologies, I build robust solutions and deliver projects on time.

With a background in technical support and customer service, I bring clear, client-focused communication and strong problem-solving skills to every project, including comfort working with modern AI-assisted development tools in my daily workflow.

EDUCATION

Montessori Professional College (Imus Campus)
Bachelor of Science in Computer Science

SEMINARS AND TRAINING

Virtual Assist Online
Virtual Assistant Courses

Clairvoyance E-learning Academy
Bookkeeping and Accounting Seminar

PROJECTS

Centralized System
Vue.js, Node.js, MySQL

- Built a centralized web platform that auto-captures employee performance on login, automates checklist collection, and integrates with existing systems, giving teams a single real-time management hub.

BeshyBakes
React, Tailwind CSS, Vite

- Created a customer-focused bakery website highlighting specialty baked goods and simplifying online ordering for cookies, cupcakes, and loaf cakes.

Twist and Treats
React, Tailwind CSS, Vite

- Developed a responsive bakery/cafe website with online ordering, crafted to showcase baked products, balloon designing, and catering services while delivering a smooth and user-friendly customer experience.
